R003537MW	Junior Rajah 2	14/01/2021	LXF/120	0.0162
Average in breeding of Middle White Boars in the Genebank				0.0207

Mean Inbreeding for the UK Middle White Population:

2019: 0.0500, 2020: 0.0503, 2021: 0.0532, 2022: 0.0528, 2023: 0.05497

Middle White Conservation Targets for 2024

1. Source the two boars for the genebank as a priority
2. Place a Rajah in the South West
3. Use the farm parks that are working with the breed to help the geographical spread of the lines.

Breed Rep Report

Although numbers are down as expected with a lot of pedigree pigs on the whole I think we have faired better than expected.

We haven't reached all of the goals set out for 2023 but hopefully by the middle of this year we will of achieved most.

Assessment of 2023 Targets

- A Lady's Maid has been moved to the North. A Silk and a Carnation are moving to the South in the next few weeks.
- A Revival boar will be moving one to Anglia and the other North.
- A Sovereign boar is currently in the South and a Rajah in Anglia on loan.
- The Sovereign boar needs to be monitored along with the Purity and Lady's Maid.
